

# Guernsey Quarterly Travel and Visitor Accommodation Bulletin

Quarter 4 2023

Issue date 8th February 2024

The Guernsey Quarterly Travel and Visitor Accommodation Bulletin provides information on travellers into and out of the Island of Guernsey and utilisation of visitor accommodation.

States of Guernsey  
Data and Analysis

## 1.1 Introduction

The Guernsey Quarterly Travel and Visitor Accommodation Bulletin provides information on visitors to the Island of Guernsey and the accommodation they stayed in, as well as Guernsey residents travelling to destinations outside the Bailiwick. It uses data gathered via surveys of people leaving Guernsey, alongside data provided by visitor accommodation providers and Guernsey Ports.

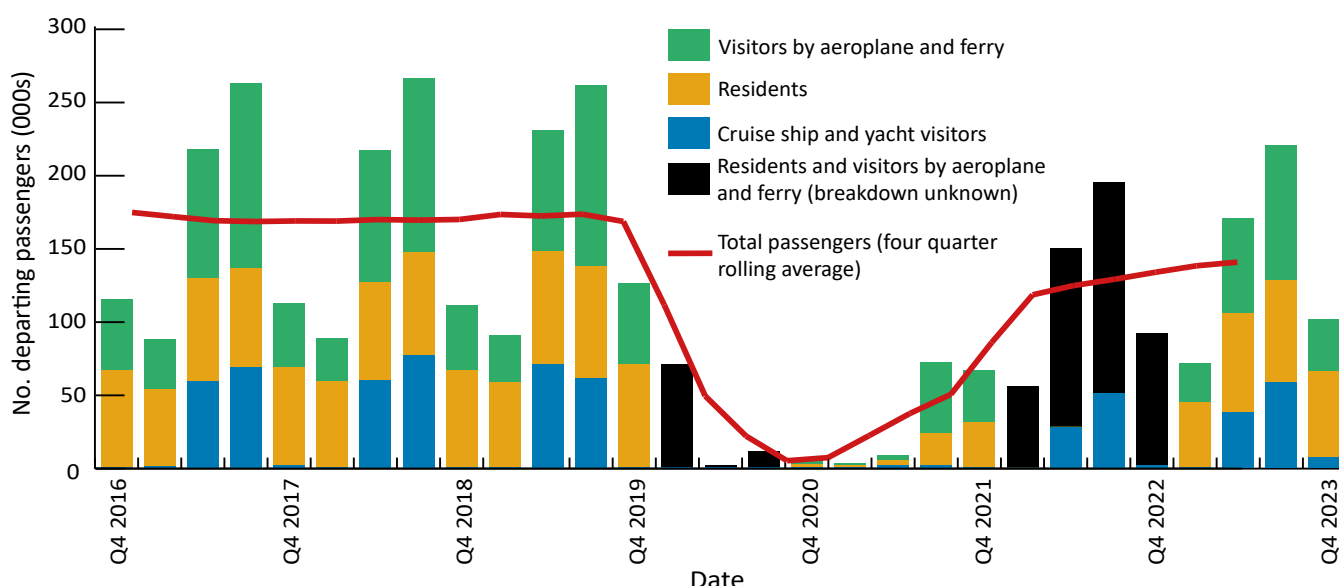

This is the fifth Guernsey Quarterly Travel and Visitor Accommodation Bulletin. Some data was not collected during the COVID-19 pandemic, but is now being collected again (although, in some cases, with a different methodology). Feedback was invited, following publication of the Q1 2023 Bulletin, and as a result, some additional information has been included in subsequent editions. More feedback is always welcome.

Previous Guernsey Travel Survey reports are available via [https://www.gov.gg/travel\\_and\\_visitor](https://www.gov.gg/travel_and_visitor).

Statistics are presented in a comparable manner over time and with other jurisdictions wherever possible. It should be noted that the passenger volume figures throughout this report exclude travel between the Islands within the Bailiwick of Guernsey. Also, Herm, Sark and Alderney residents are only included in the analysis if they were in Guernsey “in transit” i.e. travelling via Guernsey to or from somewhere outside of the Bailiwick. For reporting purposes within this Bulletin, they are classified as Visitors and the purpose of their visit is classified as “Other” (along with residents of places outside the Bailiwick of Guernsey that were transiting through Guernsey on their way to or from a destination outside the Bailiwick).

## 1.2 Headlines

**Figure 1.2.1 Passenger volumes - departing passengers**

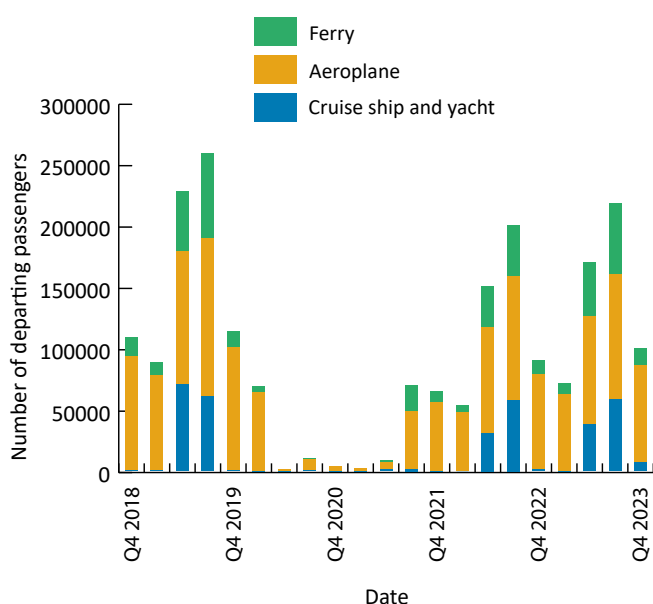

COVID-19 related requirements were put in place for people travelling into Guernsey in February 2020 and remained in place throughout 2021 with no non-essential travel allowed between 12th March 2020 and 20th May 2020 or between 14th January 2021 and 22nd March 2021. The requirements varied depending on the country of origin and vaccination status of the traveller. All COVID-19 related travel restrictions were lifted on 17th February 2022. As such, comparisons in this report are mainly drawn between 2019 and 2023. Travel to and from the Island is highly seasonal as can be seen in **Figure 1.2.1**, so the same quarter of each year is used for comparison throughout this Bulletin.

## 1.2 Headlines (continued)

- The total number of (resident and visiting) passengers (including any cruise and yacht passengers) departing Guernsey was 101,248 during quarter four 2023. This compares with 91,290 during quarter four 2022; an increase of 11%. However, it is 12% lower than in quarter four 2019.
- During the fourth quarter of 2023, 78% of passengers departed by aeroplane, 15% by ferry and 7% by cruise ships or yachts. In the fourth quarter of 2019 the breakdown was: 88% of passengers departing by aeroplane, 12% by ferry, and less than 1% by cruise ships or yachts. It should be noted that the weather can impact on travel volumes and have different impacts on the different modes of transport.
- 76% of departing passengers were going to an air or sea port in the UK, 12% Jersey, 4% rest of the world and 7% were on a cruise ship or yacht trip during Q4 2023.
- The total number of departing visitors (including any cruise and yacht passengers), for Q4 2023 was 42,270; 5% lower than Q4 2019. The total number of departing visitors (excluding any cruise and yacht passengers), for Q4 2023 was 35,234; 21% lower than Q4 2019. The total number of departing residents was 58,354; 16% lower than Q4 2019.
- Of the residents, the main purpose of their trip away was leisure for 49% (28,335 people). On average, residents, staying away at least one night, spent 6 nights away from Guernsey per trip in Q4 2023.
- Of the visitors: 27% were mainly visiting for leisure, 32% were mainly seeing friends or family, 17% were visiting for business purposes, 6% were visiting for another main purpose, less than 1% were long stay visitors (staying more than 30 nights but less than 1 year) and 17% were on a cruise ship or yacht trip.
- 65% of visitors during Q4 2023 were from the UK, 1% from France, 9% from Jersey and 9% from elsewhere (including Alderney, Sark and Herm). The country of residence was unknown for the 17%, who were visiting on a yacht or cruise ship.
- 12% of all visitors had visited Guernsey on a day trip and 17% on a cruise ship or yacht trip during Q4 2023, whereas 71% had stayed in Guernsey for one to 30 nights and less than 1% had stayed for 31 nights or more. The average length of stay for those who stayed at least one night but 30 or less nights in Q4 2023, was 4.3 nights. 66% of the visitors that stayed overnight stayed in visitor accommodation, whereas 34% stayed with friends or relatives.
- There were 1,858, 1,764 and 1,744 units of visitor accommodation available for booking in October, November and December 2023 respectively. The occupancy of available units was 52% in October, 40% in November and 38% in December 2023. It should be noted that visitor accommodation could be occupied by visitors or residents during 2023. See [page 18](#) for information on the capacity of the visitor accommodation over time in terms of maximum numbers of people that can be accommodated.
- The net promoter score given by visitors leaving by aeroplane or ferry was 52 percentage points. Higher scores (of 67 and 65 percentage points respectively) were given by visitors seeing friends/family and those visiting for leisure than by those visiting for business/work/conference/training (21 percentage points).

## 2.1 Passenger volumes

**Figure 2.1.1 Passenger volumes**

Data is collected by Guernsey Ports on the volumes of passengers travelling into and out of Guernsey. Just the volumes of passengers leaving the Island are presented here to represent the number of people (since most people have both outbound and return travel). It should be noted that these passenger volume figures exclude travel between the Islands within the Bailiwick of Guernsey. Herm, Sark and Alderney residents are only included in the analysis if they were in Guernsey “in transit” i.e. travelling via Guernsey to or from somewhere outside of the Bailiwick.

As shown in **Figure 2.1.1** with the exception of the COVID-19 related travel requirements (which were put in place for people travelling into Guernsey in February 2020 and remained in place throughout 2021 with no non-essential travel allowed between 12th March 2020 and 20th May 2020 or between 14th January 2021 and 22nd March 2021), the quarterly number of passengers is highly seasonal. Higher numbers of departing passengers are typically recorded during Quarter 2 and Quarter 3 each year, whilst lower numbers of passengers are recorded during Quarter 1 and Quarter 4. For this reason comparisons of passenger volumes are made with the equivalent periods in previous years. Total departing passengers in Q4 2023, as shown in **Table 2.1.1**, was 101,248, 11% higher than Q4 2022, but 12% lower than pre COVID-19 passenger volumes in Q4 2019.

78% of all departing passengers travelled by aeroplane in Q4 2023, 79,447 people, 3% higher than Q4 2022 but 21% lower than Q4 2019. 15% of all passengers travelled by ferry in Q4 2023, 14,765 people, 20% higher than Q4 2022 and 5% higher than Q4 2019.

**Table 2.1.1 Passenger volumes**

	Q4 2019	Q4 2020	Q4 2021	Q4 2022	Q4 2023	Annual % change	4 yr % change
<b>Passengers departing Guernsey by aeroplane</b>	100,597	3,984	55,942	77,490	79,447	3%	-21%
<b>Passengers departing Guernsey by ferry</b>	14,010	1,349	9,993	12,295	14,765	20%	5%
<b>Passengers departing Guernsey by cruise ship and yacht</b>	350*	33*	143*	1,505*	7,036	368%	1910%
<b>Total departing passengers</b>	114,957	5,366	66,078	91,290	101,248	11%	-12%

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

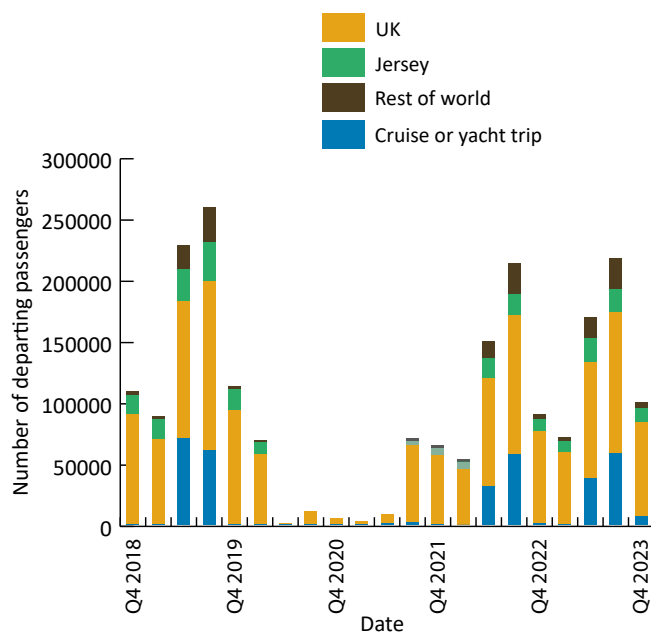

## 2.2 Passenger volumes by destination

Data from Guernsey Ports is also available regarding the destinations of those travelling out of Guernsey by aeroplane and ferry. At present, the destination of those departing on cruise ships or yachts cannot be provided, but the total volume of departures is included for completeness.

As shown in **Figure 2.2.1** with the exception of the COVID-19 related travel requirements (which were put in place for people travelling into Guernsey in February 2020 and remained in place throughout 2021 with no non-essential travel allowed between 12th March 2020 and 20th May 2020 or between 14th January 2021 and 22nd March 2021), the quarterly number of passengers is highly seasonal. Higher numbers of departing passengers are typically recorded during Quarter 2 and Quarter 3 each year, whilst lower numbers of passengers are recorded during Quarter 1 and Quarter 4. For this reason comparisons of passenger volumes are made with equivalent periods in previous years.

76% of all passengers departed Guernsey for the UK, totalling 77,032 people in Q4 2023, 3% higher than Q4 2022 but 18% lower than Q4 2019. 12% of all passengers departing Guernsey were travelling to Jersey and totalled 12,640 people in Q4 2023, 12% higher than Q4 2022 but 28% lower than Q4 2019. 4% of passengers departed Guernsey for the rest of the world and totalled 4,540 people in Q4 2023, 25% higher than Q4 2022 and 41% higher than Q4 2019. 17% of passengers departed Guernsey on a cruise or yacht trip in Q4 2023, 7,036 people.

**Figure 2.2.1 Passenger volumes by destination**

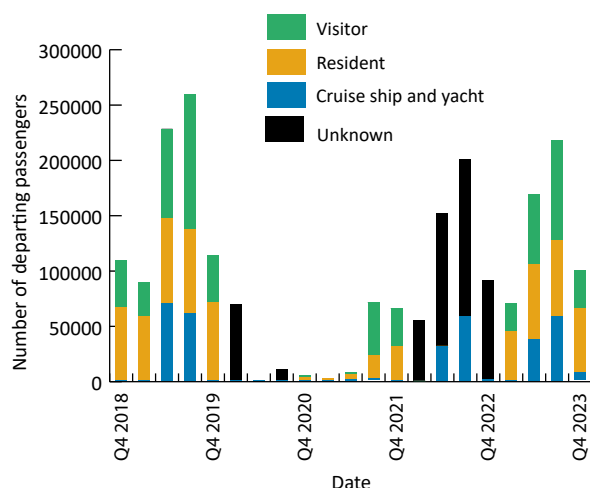

**Table 2.2.1 Passenger volumes by destination**

	Q4 2019	Q4 2020	Q4 2021	Q4 2022	Q4 2023	Annual % change	4 yr % change
Passengers departing Guernsey for United Kingdom	93,797	4,899	56,402	74,897	77,032	3%	-18%
Passengers departing Guernsey for Jersey	17,579	273	7,494	11,258	12,640	12%	-28%
Passengers departing Guernsey for rest of world	3,231	161	2,039	3,630	4,540	25%	41%
Passengers departing Guernsey on cruise or yacht trip	350*	33*	143*	1,505*	7,036	368%	1910%
Total departing passengers	114,957	5,366	66,078	91,290	101,248	11%	-12%

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

## 2.3 Passenger volumes - visitors and residents

**Figure 2.3.1 Passenger volumes - visitors and residents**

Data is collected from passengers departing by aeroplane or ferry via a short interview-style survey. 12% of departing passengers were surveyed in Q4 2023 (stratified by destination and port), which provides statistics with 95% confidence that they are accurate to within 1%. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

One of the questions asked is whether travellers are resident in Guernsey or a visitor to the Island. It should be noted that within this Bulletin, Herm, Sark and Alderney residents are classified as Visitors. They are only included in the analysis if they were in Guernsey “in transit” i.e. travelling via Guernsey to or from somewhere outside of the Bailiwick (along with residents of places outside the Bailiwick of Guernsey that were transiting through Guernsey on their way to or from a destination outside the Bailiwick).

Prior to March 2020 surveys were conducted at the airport and harbour to determine the composition of passengers. When restrictions were put in place to reduce the impact of COVID-19 these surveys were suspended and the breakdown of passengers could not be determined. When the Travel Tracker system was introduced in late 2020, a limited amount of information about passengers could again be collected. However this was discontinued in February 2022.

**Table 2.3.1 Visitor and resident passenger volumes**

	Q4 2019	Q4 2020	Q4 2021	Q4 2022	Q4 2023	4 yr % change
<b>Residents departing Guernsey by aeroplane</b>	64,648	2,072	26,237	-	51,060	-21%
<b>Residents departing Guernsey by ferry</b>	5,122	701	4,687	-	7,294	42%
<b>Visitors departing Guernsey by aeroplane</b>	35,448	1,912	29,705	-	27,877	-21%
<b>Visitors departing Guernsey by ferry</b>	8,888	648	5,306	-	7,357	-17%
<b>Visitors departing Guernsey by cruise ship and yacht</b>	350*	13*	143*	1,505*	7,036	1910%
<b>Total departing residents</b>	69,770	2,773	30,924	-	58,354	-16%
<b>Total departing visitors</b>	44,686	2,560	35,011	-	42,270	-5%
<b>Total visitors returning to Guernsey later</b>	501	-	-	-	625	25%

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

NB: Figures may not sum exactly to totals due to rounding.

## 2.3 Passenger volumes - visitors and residents

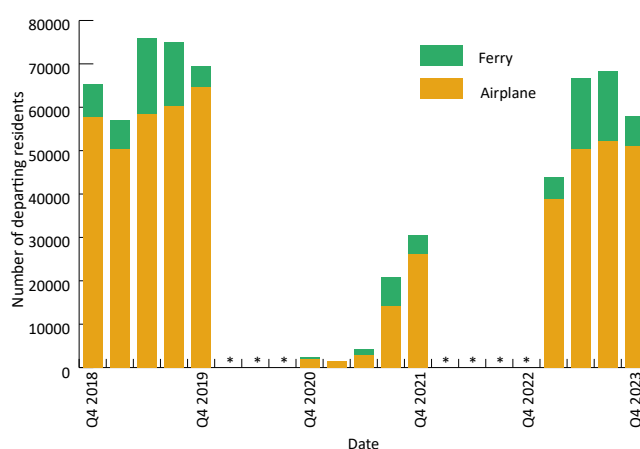

As shown in **Table 2.3.1** and **Figure 2.3.1** 58,354 passengers, 58% of those departing Guernsey in Q4 2023 were residents, whilst 42% of those departing Guernsey were visitors (42,270 passengers). A small proportion, less than 1%, 625 visitors reported that they were returning to Guernsey later. In order to avoid duplication in sampling no further visitor information is collected from those passengers who report they are returning later and they are excluded from any subsequent analysis in this Bulletin.

At present, those departing on cruise ships or yachts are not asked to complete the same survey; within this report it is assumed that all passengers departing on cruise ships or yachts are visitors.

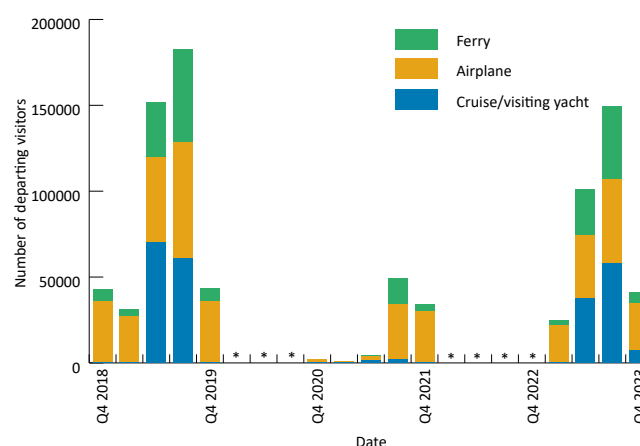

**Figure 2.3.2** shows the volume of residents travelling by ferry and aeroplane each quarter. In Q4 2023, 88%, 51,060 residents travelled by aeroplane, the remainder, 12%, 7,294 residents travelled by ferry. The number of residents travelling by aeroplane in Q4 2023 was 21% lower than the number travelling by aeroplane in Q4 2019. The number of residents travelling by ferry in Q4 2023 was 42% higher than the number travelling by ferry in Q4 2019.

**Figure 2.3.3** shows the volume of visitors travelling by ferry, aeroplane, cruise ship/visiting yacht each quarter. In Q4 2023, 66%, 27,877 visitors travelled by aeroplane, 17%, 7,357 visitors travelled by ferry and 17%, 7,036 people travelled by visiting yacht or cruise ship. The number of visitors travelling by aeroplane in Q4 2023 was 21% lower than the number travelling by aeroplane in Q4 2019. The number of visitors travelling by ferry in Q4 2023 was 17% lower than the number travelling by ferry in Q4 2019.

**Figure 2.3.2 Resident passenger volumes**

**Figure 2.3.3 Visitor passenger volumes**

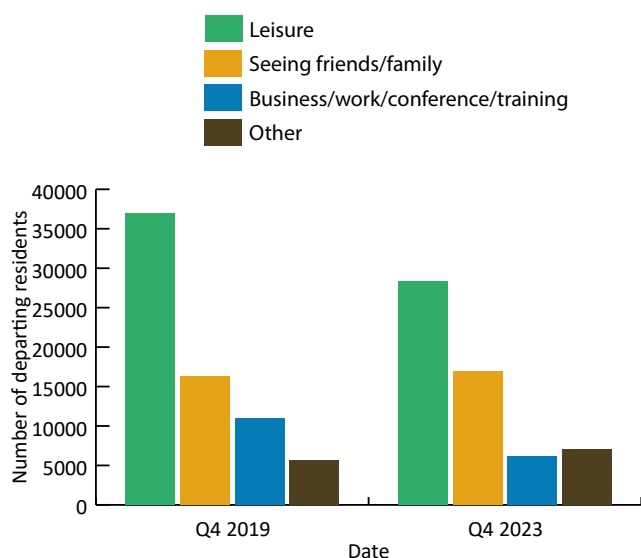

\*When restrictions were put in place to reduce the impact of COVID-19, surveys of exiting passengers at the airport and harbour were suspended between Q1 2020 and Q1 2023. A limited amount of passenger information was collected from the travel tracker system which was in place between Q4 2020 and Q4 2021. In Q1 2023 exit surveys were re-instigated and full passenger breakdown could again be reported.

## 3.1 Residents - main purpose of trip away from Guernsey

**Figure 3.1.1 Residents - main purpose of trip away from Guernsey**

**Table 3.1.1 Residents - main purpose of trip away from Guernsey**

	Q4 2019	Q4 2023	4 yr % change
Leisure (e.g. holiday/vacation/break)	36,948	28,335	-23%
Seeing friends/family (including weddings, funerals etc)	16,280	16,894	4%
Business/work/conference/training	10,921	6,110	-44%
Other	5,621	7,015	25%
<b>Total</b>	<b>69,770</b>	<b>58,354</b>	<b>-16%</b>

NB: Figures may not sum exactly to totals due to rounding.

Data is collected from a stratified sample of passengers departing Guernsey by aeroplane or ferry via a short interview-style survey. One of the questions asked of residents is what the main purpose of their trip away is. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

In Q4 2023, 49%, 28,335 residents reported the main purpose of their trip away from Guernsey was for leisure, 23% lower than the 36,948 residents who reported they were travelling for leisure in Q4 2019.

29% of all residents, 16,894 people cited they were seeing friends/family, 4% higher than the 16,280 who reported they were travelling to see friends/family in Q4 2019.

10%, 6,110 residents were leaving on business (44% lower than the 10,921 in Q4 2019) and 12%, 7,015 were leaving for other reasons (5,621 in Q4 2019). Other reasons include residents travelling for medical/hospital purposes, residents participating in sport and residents on a school trip/visit.

## 3.2 Residents - destination and length of trip away from Guernsey

Passenger exit survey questions include asking residents what their destination port is, whether this is their final destination port and how many nights they plan to spend away from the Island. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

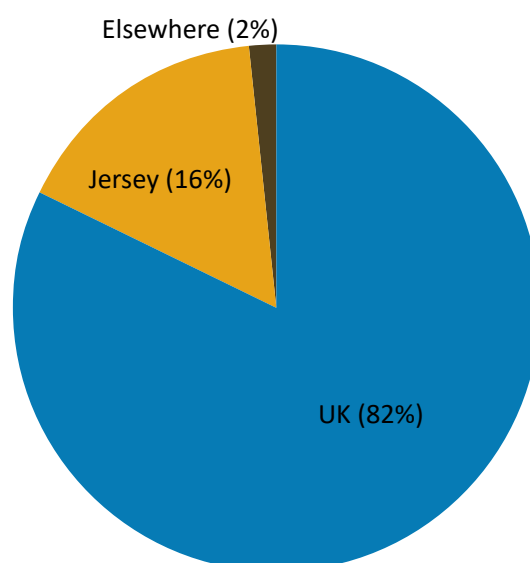

The majority, 82% of residents, 47,845 people were travelling to the UK in Q4 2023, (in Q4 2019 the equivalent figure was 82% of residents and 57,401 people).

12% of residents travelled to Jersey, 7,134 people, for Q4 2019 this was 16% of residents and 11,307 people. The number of residents travelling to Jersey during Q4 2023 was 37% lower than for Q4 2019. 6% of residents, 3,375 people travelled elsewhere during Q4 2023 (2%, 1,061 residents travelled elsewhere in Q4 2019), 218% higher than Q4 2019.

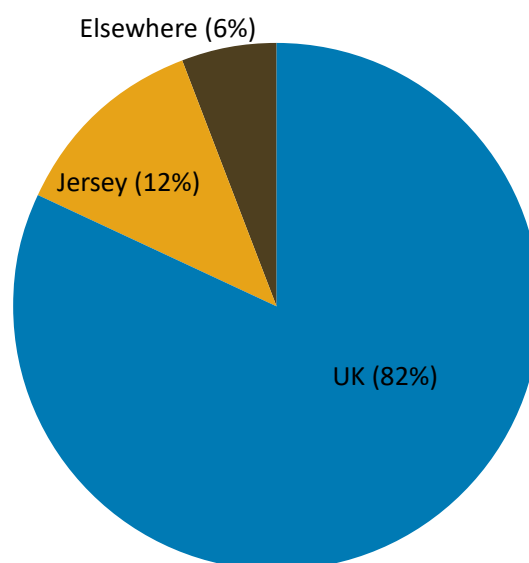

79% of all those surveyed during Q4 2023 stated that their final destination was nearby to the airport/port travelled to. Residents travelling to London Gatwick were most likely to state that their final destination was not nearby; 57% said their final destination was nearby.

Day trips accounted for 1% of all residents trips during Q4 2023. The average length of trip by residents during Q4 2023 was 6 nights.

**Figure 3.2.1 Residents - destination port Q4 2019**

**Figure 3.2.2 Residents - destination port Q4 2023**

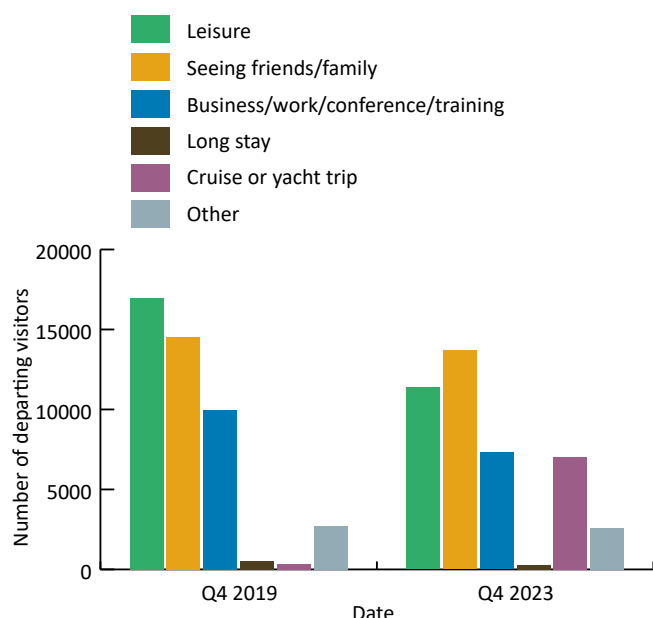

**Table 3.2.1 Residents - destination port**

	Q4 2019	Q4 2023	4 yr % change
United Kingdom	57,401	47,845	-17%
Jersey	11,307	7,134	-37%
Rest of world	1,061	3,375	218%
Total	69,770	58,354	-16%

NB: Figures may not sum exactly to totals due to rounding.

## 4.1 Visitors - main purpose of trip to Guernsey

**Figure 4.1.1 Visitors - main purpose of trip to Guernsey**

One of the questions asked of visitors during passenger exit surveys is what the main purpose of their trip to Guernsey is. Survey results are applied to overall passenger volumes to give figures for the whole quarter. At present, those departing on cruise ships or yachts are not asked to complete the same survey, but the overall number of these visitors is still included in this section for completeness.

In Q4 2023, 11,376 visitors reported the main purpose of their trip to Guernsey was for leisure (16,592 in Q4 2019). 13,682 visitors cited they were seeing friends/family (14,518 in Q4 2019), 7,313 were here for business (9,950 in Q4 2019) and 2,594 were here for other reasons (2,737 in Q4 2019). Other reasons include visitors to Guernsey in transit, visitors on a school trip/visit, visitors in Guernsey for medical/hospital purposes and visitors participating in sport.

**Table 4.1.1 Visitors - main purpose of trip to Guernsey**

	Q4 2019	Q4 2023	4 yr % change
Leisure (e.g. holiday/vacation/break)	16,592	11,376	-31%
Seeing friends/family (including weddings, funerals etc)	14,518	13,682	-6%
Business/work/conference/training	9,950	7,313	-27%
Long stay (more than 30 nights but less than 1 year for work/other purpose)	539	270	-50%
Cruise or yacht trip*	350	7,036	1910%
Other	2,737	2,594	-5%
<b>Total</b>	<b>44,686</b>	<b>42,270</b>	<b>-5%</b>

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

NB: Figures may not sum exactly to totals due to rounding.

7,036 visitors to Guernsey during Q4 2023 visited by yacht or cruise ship. 270 visitors during Q4 2023 were long stay visitors, having stayed more than 30 nights but less than 1 year. The majority of long stay visitors were in Guernsey for work reasons.

76% of all visitors to Guernsey during Q4 2023 said they had visited Guernsey before. Of those that had previously visited Guernsey, 2% had visited Guernsey on a cruise.

## 4.2 Visitors - country of residence

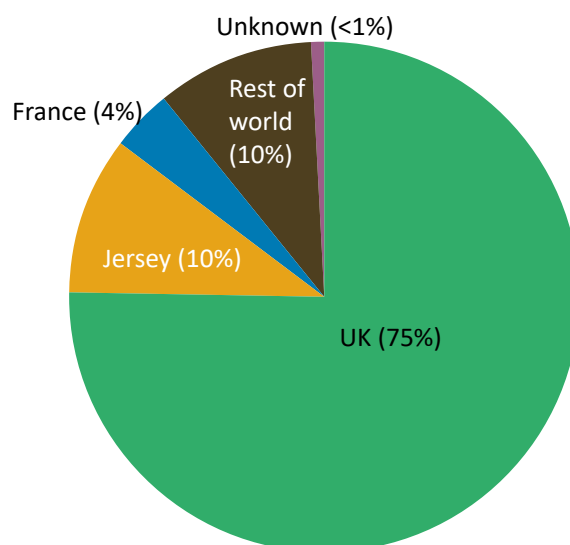

Another of the questions asked of visitors during passenger exit surveys is their country of residence. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

At present, those departing on cruise ships or yachts are not asked to complete the same survey, but the overall number of these visitors is still included in this section for completeness.

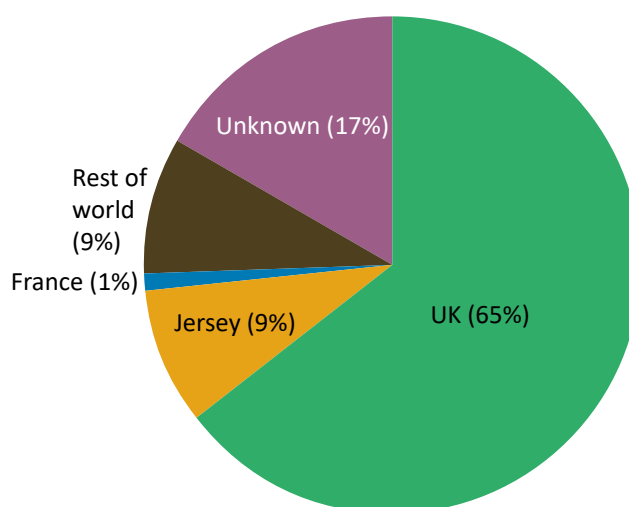

During Q4 2023, 65% of all visitors, 27,277 people reported their country of residence was the UK (75%, 33,663 in Q4 2019). 1%, 402 visitors were from France (4%, 1,753 in Q4 2019). 9%, 3,830 visitors were from Jersey (10%, 4,477 in Q4 2019), 9%, 3,724 visitors were from the Rest of the world (10%, 4,443 in Q4 2019), and 17%, 7,036 visitor's country of residence was unknown, as they were visiting by cruise ship or yacht (less than 1%, 350 in Q4 2019).

Comparison between Q4 2023 and Q4 2019 reveals that in Q4 2023 there were 19% fewer visitors whose country of residence was the UK, 14% fewer visitors whose country of residence was Jersey, 77% fewer visitors whose country of residence was France and 16% fewer visitor whose country of residence was Rest of the world.

**Figure 4.2.1 Visitors - country of residence Q4 2019**

**Figure 4.2.2 Visitors - country of residence Q4 2023**

**Table 4.2.1 Visitors - country of residence**

	Q4 2019	Q4 2023	4 yr % change
United Kingdom	33,663	27,277	-19%
Jersey	4,477	3,830	-14%
France	1,753	402	-77%
Rest of world	4,443	3,724	-16%
Unknown (cruise ship and yacht passengers)*	350	7,036	1910%
Total	44,686	42,270	-5%

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

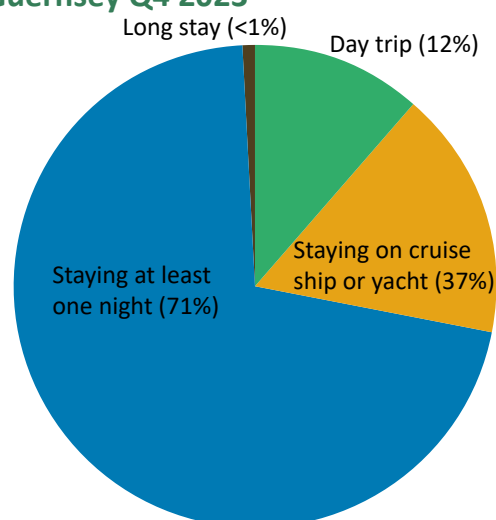

NB: Figures may not sum exactly to totals due to rounding.

## 4.3 Visitors - length of stay in Guernsey

**Figure 4.3.1 Visitors - length of stay in Guernsey Q4 2019**

**Figure 4.3.2 Visitors - length of stay in Guernsey Q4 2023**

**Table 4.3.1 Visitors - length of stay in Guernsey**

	Q4 2019	Q4 2023	4 yr % change
Day trip to Guernsey	6,470	4,889	-24%
Staying on a cruise ship or yacht*	350	7,036	1910%
Staying at least one night in Guernsey (but 30 or less nights)	37,327	30,075	-19%
Long stay (more than 30 nights but less than 1 year)	539	270	-50%
<b>Total</b>	<b>44,686</b>	<b>42,270</b>	<b>-5%</b>

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

NB: Figures may not sum exactly to totals due to rounding.

Visitors are also asked how many nights they spent in Guernsey within passenger exit surveys. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

At present, those departing on cruise ships or yachts are not asked to complete the same survey. The overall number of these visitors (who, for the most part, likely stay overnight on their boat and visit Guernsey for day trips) is included in this section for completeness.

In Q4 2023, 4,889 people visited Guernsey on a day trip, representing 12% of all visitors (6,470 people, 14% in Q4 2019). The majority, 71% of visitors, 30,075 people, stayed at least one night but less than 31 nights (37,327 people, 84% in Q4 2019). During Q4 2023 less than 1% of visitors were long stay visitors (270 people).

Comparison between Q4 2023 and Q4 2019 reveals that in Q4 2023 there were 24% fewer visitors on a day trip, 19% fewer visitors staying at least one night (but less than 31 nights) and 50% fewer long stay visitors, compared with Q4 2019.

The average length of stay for visitors staying at least one night but less than 31 nights was 4.3 nights in Q4 2023, equating to 130,040 bed nights, and compares with 4.2 nights, and 157,209 bed nights in Q4 2019.

## 4.4 Visitors - main purpose of trip of day trip visitors

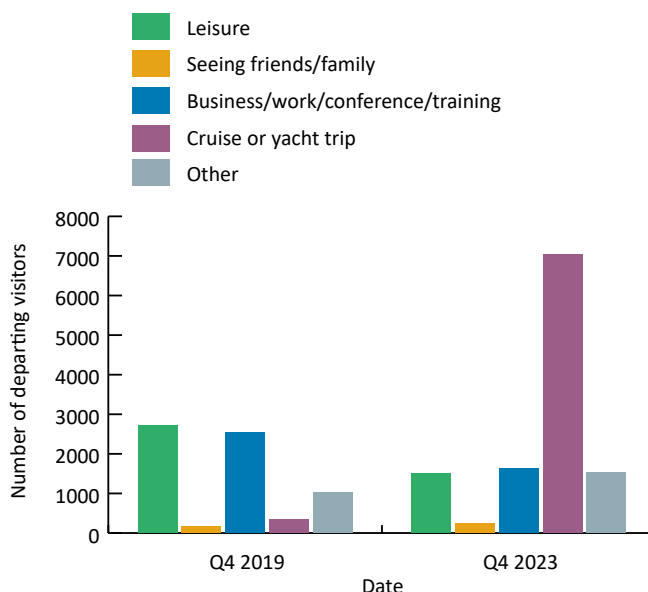

Visitors on day trips are asked what the main purpose of their trip to Guernsey is within the passenger exit surveys. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

At present, those departing on cruise ships or yachts are not asked to complete the same survey. The overall number of these visitors (who, for the most part, likely stay overnight on their boat and visit Guernsey for day trips) is included in this section for completeness.

During Q4 2023, 13% of all visitors on a day trip to Guernsey, 1,502 people, reported the main purpose of their trip to Guernsey was for leisure (45% lower than the 2,723 people who reported their day trip was for leisure purposes in Q4 2019). 248 visitors who visited Guernsey on a day trip, 2% of day trippers, cited they were seeing friends/family (168 in Q4 2019), 1,620 were here for business, 14% of all day trip visitors, (2,544 in Q4 2019) and 1,519 day trip visitors (13%) were here for other reasons (1,035 in Q4 2019).

Comparison between Q4 2023 and Q4 2019 reveals that in Q4 2023 there were 45% fewer day trippers visiting for leisure purposes, 48% more day visitors seeing friends/family, 36% fewer day visitors travelling for business/work and 47% more day visitors travelling for other reasons, compared with Q4 2019.

**Figure 4.4.1 Main purpose of trip of day trip visitors**

**Table 4.4.1 Main purpose of trip of day trip visitors**

	Q4 2019	Q4 2023	4 yr % change
<b>Leisure (e.g. holiday/vacation/break)</b>	2,723	1,502	-45%
<b>Seeing friends/family (including weddings, funerals etc)</b>	168	248	48%
<b>Business/work/conference/training</b>	2,544	1,620	-36%
<b>Cruise or yacht trip*</b>	350	7,036	1910%
<b>Other</b>	1,035	1,519	47%
<b>Total</b>	6,820	11,925	75%

\*Between Q4 2019 and Q2 2023 the number of people visiting by yacht was unknown, but the number has been inferred from the number of visiting yachts and the average number of people each vessel typically has on board.

NB: Figures may not sum exactly to totals due to rounding.

## 4.4 Visitors - country of residence by main purpose of trip of day visitors

**Figure 4.4.2 Day trip visitors - country of residence by main purpose of visit**

**Table 4.4.2 Q4 2019 Day trip visitors - country of residence by main purpose of visit**

	UK (%)	Jersey (%)	France (%)	Rest of World (%)
Leisure (e.g. holiday/vacation/break)	58	7	21	10
Seeing friends/family (including weddings, funerals etc)	2	3	0	0
Business/work/conference/training	31	74	0	22
Other	9	16	79	69
Total	100	100	100	100

**Table 4.4.3 Q4 2023 Day trip visitors - country of residence by main purpose of visit**

	UK (%)	Jersey (%)	France (%)	Rest of World (%)
Leisure (e.g. holiday/vacation/break)	37	24	71	20
Seeing friends/family (including weddings, funerals etc)	5	7	0	0
Business/work/conference/training	31	47	0	10
Other	28	22	29	69
Total	100	100	100	100

NB: Figures may not sum exactly to 100 due to rounding.

A further breakdown for day trip visitors, by country of residence and main purpose of visit, is provided in **Figure 4.4.2** and **Tables 4.4.2** and **4.4.3**.

In Q4 2023, 37%, of day trip visitors from the UK reported the main purpose of their day trip to Guernsey was for leisure, compared with 58% in Q4 2019. 31% of day trip visitors from the UK were here for business purposes, the same proportion as in Q4 2019, and 28% of day trip visitors from the UK were in Guernsey for other reasons.

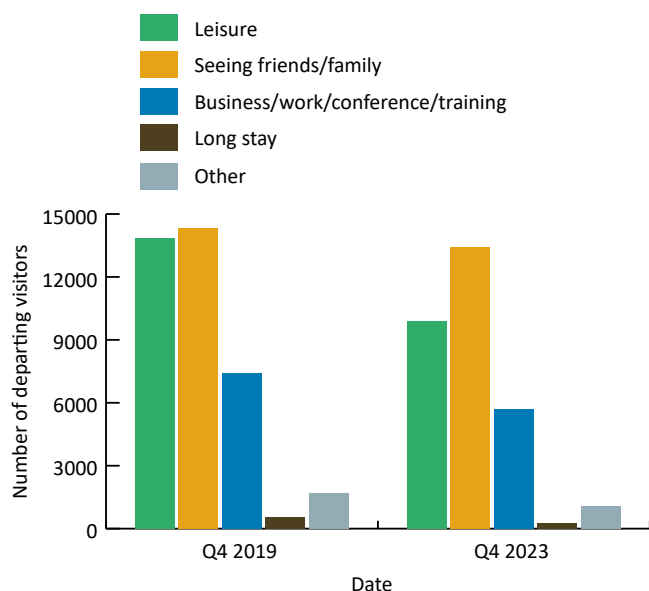

The principal reasons for day trip visits in Q4 2023 from those whose country of residence is Jersey were business reasons 47%; this compares with 74% in Q4 2019. 24% of day trip visitors whose country of residence is Jersey visited for leisure in Q4 2023, which compares with 7% in Q4 2019.

Visitors from France were most likely to report in Q4 2023 that their main purpose of visit was leisure; 71%. This compares with 21% in Q4 2019.

69% of day trip visitors to Guernsey during Q4 2023 whose country of residence was the Rest of the world reported they were in Guernsey for other reasons, the same proportion as in Q4 2019. 20% of day trip visitors from the Rest of the world were in Guernsey for leisure purposes during Q4 2023.

## 4.5 Visitors - main purpose of visit of staying visitors

**Figure 4.5.1 Main purpose of trip of staying visitors**

**Table 4.5.1 Main purpose of trip of staying visitors**

	Q4 2019	Q4 2023	4 yr % change
Leisure (e.g. holiday/vacation/break)	13,869	9,875	-29%
Seeing friends/family (including weddings, funerals etc)	14,350	13,433	-6%
Business/work/conference/training	7,406	5,693	-23%
Long stay (more than 30 nights but less than 1 year)	539	270	-50%
Other	1,702	1,074	-37%
<b>Total</b>	<b>37,866</b>	<b>30,344</b>	<b>-20%</b>

NB: Main purpose of visitor breakdown may not add to totals due to rounding. Sample proportions are applied to actual passenger numbers to determine purpose of trip for staying visitors.

Visitors staying in Guernsey are also asked what the main purpose of their trip to Guernsey is. Survey results are applied to overall passenger volumes to give figures for the whole quarter.

Those departing on cruise ships or yachts are included in [section 4.4](#) alongside day trip visitors, since they, for the most part, likely stay overnight on their boat rather than ashore in Guernsey.

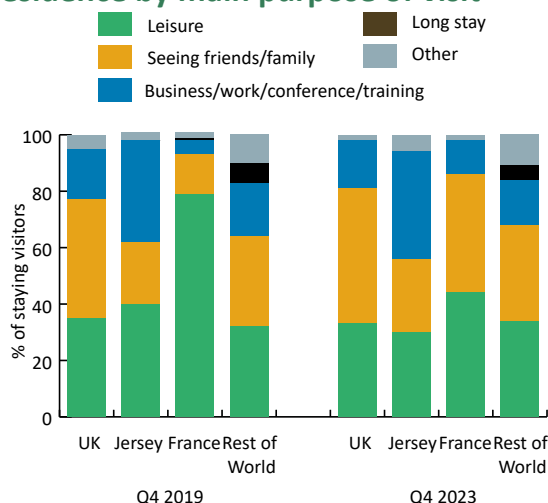

In Q4 2023, 33% or 9,875 of all staying visitors reported the main purpose of their trip to Guernsey was for leisure (13,869 in Q4 2019). 44% or 13,433 staying visitors cited they were seeing friends/family (a similar level to the 14,350 who reported they were seeing friends/family in Q4 2019), 19%, 5,693 were here for business or work reasons (7,406 in Q4 2019) and 4%, 1,074 were here for other reasons (1,702 in Q4 2019). Less than 1% or 270 visitors were long stay visitors, having stayed more than 30 nights but less than 1 year, in Q4 2023 (539 visitors in Q4 2019).

Comparison between Q4 2023 and Q4 2019 reveals that in Q4 2023 there were 29% fewer staying visitors visiting for leisure purposes, 6% fewer staying visitors seeing friends/family, 23% fewer staying visitors travelling for business/work and 37% fewer staying visitors travelling for other reasons, compared with Q4 2019.

## 4.5 Visitors - country of residence by main purpose of trip of staying visitors

**Figure 4.5.2 Staying visitors - country of residence by main purpose of visit**

**Table 4.5.2 Q4 2019 Staying visitors - country of residence by main purpose of visit**

	UK (%)	Jersey (%)	France (%)	Rest of World (%)
Leisure (e.g. holiday/vacation/break)	35	40	79	32
Seeing friends/family (including weddings, funerals etc)	42	22	14	32

Other	4	3	2	10
<b>Total</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

**Table 4.5.3 Q4 2023 Staying visitors - country of residence by main purpose of visit**

	UK (%)	Jersey (%)	France (%)	Rest of World (%)
Leisure (e.g. holiday/vacation/break)	33	30	44	34
Seeing friends/family (including weddings, funerals etc)	48	26	42	34
Business/work/conference/training	17	38	12	16
Long stay	<1	0	<1	5
Other	2	6	2	11
<b>Total</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

A further breakdown for staying visitors, by country of residence and main purpose of visit, is provided in **Figure 4.5.2** and **Tables 4.5.2** and **4.5.3**.

In Q4 2023, 48% of staying visitors from the UK reported the main purpose of their trip to Guernsey was seeing friends/family, compared with 42% in Q4 2019. 33% of staying visitors from the UK were leisure visitors, compared to 35% in Q4 2019, and 17% of staying visitors from the UK were in Guernsey for business/work reasons.

The principal reasons for staying visits in Q4 2023 from those with country of residence of Jersey were business and leisure reasons; 38% and 30% respectively. This compares with 36% and 40% in Q4 2019.

Visitors from France were most likely to report in Q4 2023 that their main purpose of visit was for leisure, at 44%. This compares with 79% of staying visitors from France in Q4 2019. 42% whose country of residence was France reported they were seeing friends/family during Q4 2023. 12% cited they were in Guernsey for business purposes.

In Q4 2023, 34% of staying visitors whose country of residence was the Rest of the world reported they were visiting Guernsey for leisure purposes and a further 34% were seeing friends/family. A further 16% of staying visitors whose country of residence was the Rest of the world reported they were staying in Guernsey for business reasons and 5% were long stay visitors (having stayed more than 30 nights but less than 1 year).

NB: Figures may not sum exactly to 100 due to rounding.

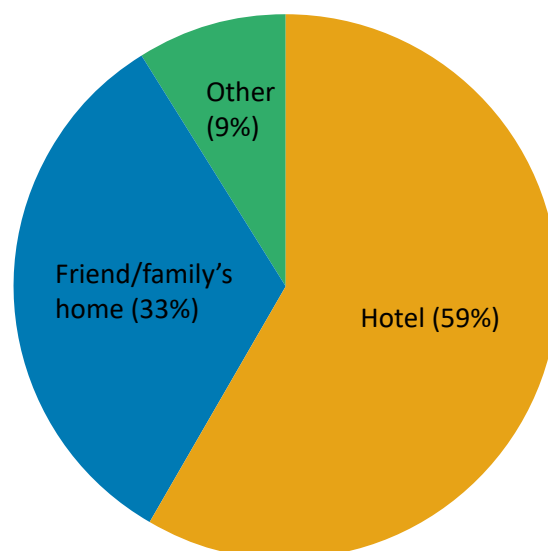

## 4.6 Visitors - accommodation of staying visitors

Visitors who stayed in Guernsey overnight are asked an extra question about the type of accommodation they stayed in as part of the exit survey. Survey results are applied to overall passenger volumes to give figures for the whole quarter. Those visitors staying in Guernsey more than 30 nights (long stay) are excluded from this analysis.

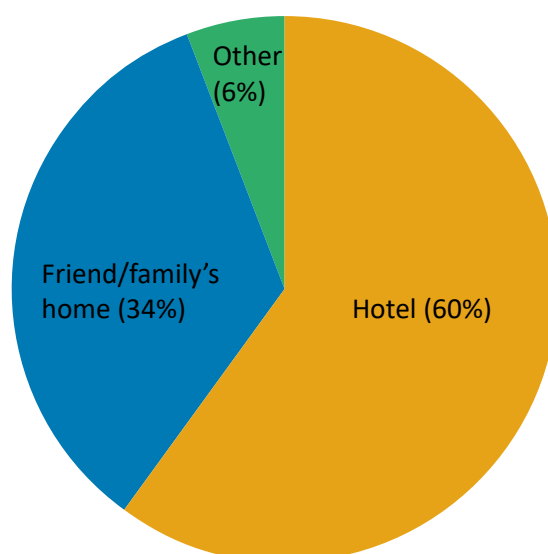

As shown in **Figure 4.6.1**, **Figure 4.6.2** and **Table 4.6.1**, in Q4 2023, 60% of all visitors staying in Guernsey stayed in hotels, (18,107 people), 34% stayed with friends/family (10,278 people) and 6% stayed in other accommodation (1,690 people). The other category includes guest houses, any accommodation listed on Airbnb or other online booking portals, self-catering units and campsites etc. Comparison between Q4 2023 and Q4 2019 reveals that in Q4 2023 there were 17% fewer visitors staying in hotels, 16% fewer visitors staying in friend/family's homes and 48% fewer visitors staying in Other accommodation, compared with Q4 2019.

On average visitors in hotels stayed 3.5 nights in Q4 2023 and equates to 63,653 bed nights (3.3 nights in Q4 2019). During Q4 2023 the average length of stay with friends/family was 5.2 nights, equating to 53,468 bed nights (5.5 nights in Q4 2019) and the average length of stay in Other (which includes guest houses, any accommodation listed on Airbnb or other online booking portals, self-catering units and campsites etc) was 6.5 nights equating to 10,912 bed nights.

**Figure 4.6.1 Accommodation for staying visitors Q4 2019**

**Figure 4.6.2 Accommodation for staying visitors Q4 2023**

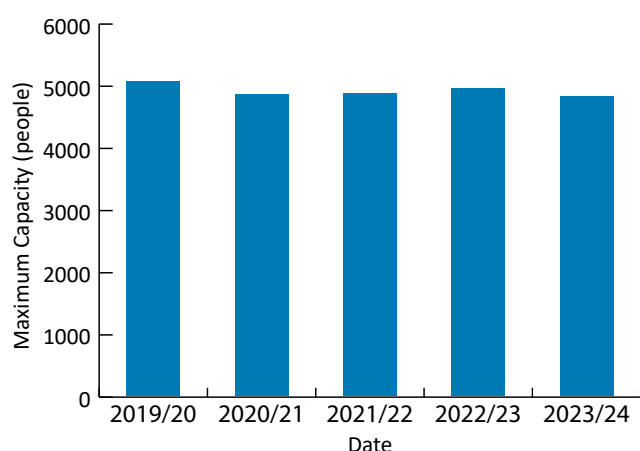

**Table 4.6.1 Accommodation for staying visitors**

	Q4 2019	Q4 2023	4 yr % change
Hotel	21,840	18,107	-17%
Friend/family's home	12,214	10,278	-16%
Other (including guest houses, accommodation listed on Airbnb or other online booking portals, self-catering units and campsites etc)	3,272	1,690	-48%
<b>Total staying visitors</b>	<b>37,327</b>	<b>30,075</b>	<b>-19%</b>

## 5.1 Visitor accommodation - capacity

**Figure 5.1.1 Visitor accommodation capacity**

**Table 5.1.1 Visitor accommodation capacity**

	2019 /20	2020 /21	2021 /22	2022 /23	2023 /24
<b>Maximum capacity (people)</b>	5,055	4,854	4,863	4,938	4,818
<b>Temporarily unavailable capacity e.g. closed for refurbishment</b>	0	0	0	120	201
<b>Total (including temporarily unavailable)</b>	5,055	4,854	4,863	5,058	5,019

NB: 2023/24 Visitor accommodation capacity differs slightly to that published in the Q1 2023 Travel and Visitor Accommodation Bulletin, as the renewal process for 2023/24 was not complete at the time of the Q1 2023 publication.

**Table 5.1.2 Additional summer capacity**

	2023
<b>Maximum additional capacity (people)</b>	320
<b>Additional number of units (equipped tents, log cabins, yurts, shepherd's huts etc)</b>	60

The visitor accommodation capacity in Guernsey and Herm can be monitored over time through the number of accommodation providers with active permits each year and the maximum capacity of each accommodation provider, as shown in **Figure 5.1.1** and **Table 5.1.1**.

Visitor accommodation capacity shows the maximum number of people that could be accommodated in permanent building structures, such as hotels, guest houses, hostels, self-catering units and other similar accommodation with an active boarding permit. Temporary structures, such as those provided by accommodation providers for glamping and camping are excluded from the capacity (for comparability with other jurisdictions). It should be noted that the capacity reported does not include accommodation that is publicly advertised (for example, via airbnb.co.uk or other booking portals), but does not have an active boarding permit.

The maximum capacity of accommodation providers with an active boarding permit for the 2023 summer season and winter 2023/24 was 4,818, as shown in **Table 5.1.1**; a 2% decline from 2022/23 and a 5% decline from 2019/20. Capacity for 201 more people was removed during 2022 and 2023, but part or all of this capacity is expected to be added back in once refurbishments have completed.

Each summer there is additional visitor accommodation provided by the campsites of Guernsey and Herm. **Table 5.1.2** indicates the maximum additional capacity provided by temporary glamping and camping structures during the summer season. For summer 2023, an additional 320 people can be accommodated in 60 units which include equipped tents, cabins, yurts and shepherd's huts. These figures do not include camping/motorhome pitches where visitors provide their own accommodation. The additional summer capacity will be recorded each year so trends in summer capacity can be monitored going forwards.

## 5.1 Visitor accommodation - availability

Each month, visitor accommodation providers with active permits are asked to provide data on the availability and occupancy of their accommodation units. The responses received in October, November and December 2023 include different accommodation types and sizes and statistics for these months are accurate to at least plus or minus 2% (at a confidence level of 95%). The responses are scaled up by the total amount of visitor accommodation (with both an active boarding permit and an aligned building use type) in order to give figures for the whole Island. 2022/23 boarding permit information was used to scale up the figures for the first quarter of 2023. 2023/24 boarding permit information was used to scale up the figures for the second, third and fourth quarters of 2023.

Units are classified as not available for booking *only* if the whole site is closed; either seasonally (in a regular pattern) or for six months or more (for refurbishment, for example). Units are added into or taken out of the total (sum of open and closed units) if a site's use is officially changed via a successful planning application or if there have been physical changes to building(s).

Occupancy (see next page) is calculated as a proportion of the available units in each month i.e. a proportion of those that could be booked.

This approach is in alignment with methods used in other jurisdictions.

This information is only available from 2023 onwards, following changes to the way data is collected from accommodation providers.

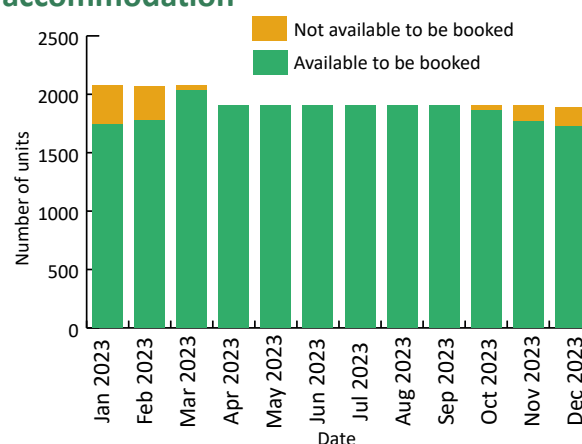

**Table 5.1.3** and **Figure 5.1.3** show that there were 1,902 visitor accommodation units in Q4 2023. During Q4 2023 there were a number of visitor accommodation seasonal closures. The proportion of visitor accommodation units available to be booked was 98%, 93% and 92% in October 2023, November 2023 and December 2023 respectively.

**Table 5.1.3 Availability of visitor accommodation**

	Number of units available to be booked	Number of units not available to be booked	Total number of units
Jan 2023	1,745	329	2,074
Feb 2023	1,775	299	2,074
Mar 2023	2,031	43	2,074
Apr 2023	1,902	0	1,902
May 2023	1,902	0	1,902
Jun 2023	1,902	0	1,902
Jul 2023	1,902	0	1,902
Aug 2023	1,902	0	1,902
Sep 2023	1,902	0	1,902
Oct 2023	1,858	44	1,902
Nov 2023	1,764	138	1,902
Dec 2023	1,744	158	1,902

NB: 2023/24 Visitor accommodation capacity differs slightly to that published in the Q1 2023 Travel and Visitor Accommodation Bulletin, as the renewal process for 2023/24 was not complete at the time of the Q1 2023 publication.

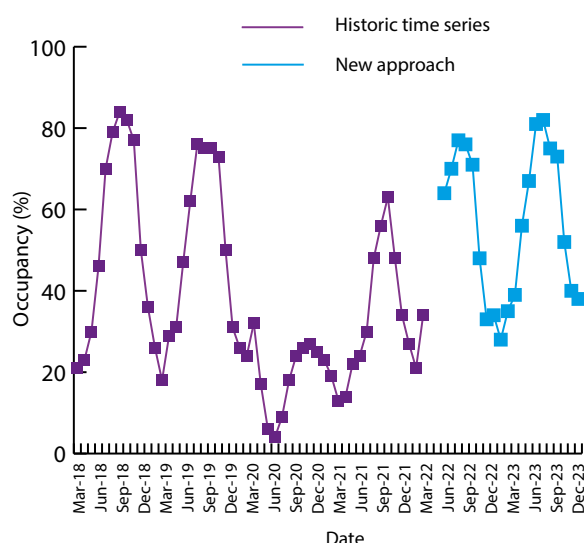

**Figure 5.1.3 Availability of visitor accommodation**

NB: Availability and occupancy (on the next page) are presented as numbers of units of visitor accommodation, since bookings are taken per whole unit, rather than per number of people to be accommodated in the unit(s). The number of units includes each hotel, guest house and hostel room plus each self-catering unit (including those listed on Airbnb or other online booking portals) with an active boarding permit. Glamping and camping units are not included within availability and occupancy statistics for alignment with methods used in other jurisdictions.

## 5.2 Visitor accommodation - occupancy

**Figure 5.2.1 Occupancy of open/available accommodation units**

**Table 5.2.1 Occupancy of open/available accommodation units**

	2019	2020	2021	2022	2023
January	18%	24%	19%	21%	28%
February	29%	32%	13%	34%	35%
March	31%	17%	14%	*	39%
April	47%	6%	22%	*	56%
May	62%	4%	24%	64%	67%
June	76%	9%	30%	70%	81%
July	75%	18%	48%	77%	82%
August	75%	24%	56%	76%	75%
September	73%	26%	63%	71%	73%
October	50%	27%	48%	48%	52%
November	31%	25%	34%	33%	40%
December	26%	23%	27%	34%	38%

\*There was a wave of cases of the Omicron variant of COVID-19, which impacted on the ability to collect full data in March and April 2022.

Occupancy is presented as a percentage of the number of available units (see P19). As shown in **Figure 5.2.1**, there is usually a seasonal pattern in occupancy, with peaks in July, August or September and troughs in January each year. This pattern was severely disrupted in 2020 during the COVID-19 pandemic, but can be seen again in 2021 and 2022.

COVID-19 related requirements were put in place for people travelling into Guernsey in February 2020 and remained in place throughout 2021 with no non-essential travel allowed between 12th March 2020 and 20th May 2020 or between 14th January 2021 and 22nd March 2021. The requirements varied depending on the country of origin and vaccination status of the traveller. All COVID-19 related travel restrictions were lifted on 17th February 2022.

Temporary planning exemptions were introduced during the COVID-19 pandemic. From 25th March 2020, providers of visitor accommodation have been permitted to accommodate non-visitors and long-stay residents all year round, provided that the establishments revert to their usual use for visitor accommodation once the temporary exemptions cease to apply (on 31st December 2023). Exemptions allowing long-stay visitors would normally apply only to self-catering establishments during the Winter Let period from 1st November to 31st March each year. There was a wave of cases of the Omicron variant of COVID-19, which impacted on the ability to collect full data in March and April 2022.

Occupancy of open units in 2023 peaked at 82% in July decreasing to 52% in October, 40% in November and 38% in December. Additional information began being collected in June 2023, which makes it possible to determine that 14% of open units in October 2023 were occupied by long-stay guests. In November 2023 23% of open units were occupied by long-stay guests and in December 34% of open units were occupied by long-stay guests. This means that long-stay guests represented 13 percentage points of the 38% occupancy of open units in December 2023.

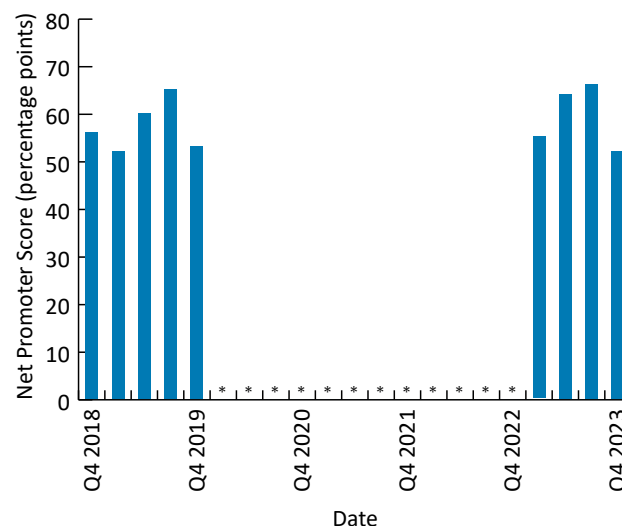

## 6.1 Net promoter score

Visitors leaving the Island by aeroplane or ferry are asked how likely they would be to recommend Guernsey to a friend or relative (as a score out of 10, with 10 meaning very likely) as part of the exit survey. Prior to 2020 net promoter scores did not include visitors whose country of residence was Alderney, as a high proportion of these passengers were in transit (returning via Guernsey to Alderney). Since Q1 2023 all passengers (regardless of country of residence) that are leaving the Island by aeroplane or ferry after only visiting Guernsey on their way to or from somewhere outside the Bailiwick (and, as such, potentially may not have left the port) are excluded from the net promoter scores analysis on this page. At present, those departing on cruise ships or yachts are not asked to complete the same survey and are not represented within the net promoter scores presented on this page.

As shown in **Figure 6.1.1** prior to March 2020 surveys were conducted at the airport and harbour to determine the composition of passengers. When restrictions were put in place to reduce the impact of COVID-19 these surveys were suspended and the breakdown of passengers could not be determined or net promoter scores ascertained.

The net promoter score is calculated by deducting the percentage of visitors surveyed that gave a score of six or less out of ten from the percentage of visitors surveyed that gave a score of ten or nine out of ten. As shown in **Table 6.1.1** and **Figure 6.1.1** the net promoter score for Q4 2023 was 52 percentage points. By main purpose of visit, those seeing friends/family had the highest net promoter score (67 percentage points) in Q4 2023, followed by those visiting for leisure purposes (65 percentage points). Those visiting on business / work purposes had the lowest net promoter score, just 21 percentage points. By country of residence, net promoter scores were highest for visitors from the UK in Q4 2023 (58 percentage points) followed by France (44 percentage points) and those from the Rest of the world (40 percentage points). Those visiting from Jersey had the lowest net promoter score (35 percentage points). Please note there can be differences in how the net promoter score question is interpreted by country of residence.

**Figure 6.1.1 Net promoter score**

\*Between Q1 2020 and Q4 2022 net promoter scores were not determined. When restrictions were put in place to reduce the impact of COVID-19, exit passenger surveys at the airport and harbour were suspended. In Q1 2023 exit surveys were re-instigated and net promoter scores could again be reported.

**Table 6.1.1 Net promoter score**

	Q4 2019	Q4 2023
<b>Net Promoter Score (percentage points)</b>	53	52

## 7.1 Methodology

Exit surveys are undertaken daily at the airport and harbour, with a random sample of departing passengers being interviewed. The proportions of resident versus visitor travellers are then applied to the actual numbers of total passengers (provided by the airport and harbour authorities) to determine the passenger composition of Guernsey's main air and sea routes. The survey is conducted using internationally accepted methodology.

In Q4 2023, 6,153 completed interviews were conducted with individuals at the harbour and airport, who responded to the survey on behalf of their immediate travelling party. These interviews represented a total party size of 11,057 passengers, which is 12% of the total number of passengers departing Guernsey during Q4 2023 (excluding those travelling within the islands of the Bailiwick and those departing by cruise ship or yacht).

All sample surveys are subject to a degree of statistical error. This quarter there were 6,153 interviews conducted and it was found that 42% of respondents were departing visitors. With a 95% confidence level, the margin of error is plus or minus 1%. In other words, there is a 95% probability that the proportion of departing visitors lies within the range of 41% to 43%. As the sample sizes decrease (for individual routes, purposes of visit and types of accommodation for example), so the margin of error increases.

Each month, visitor accommodation providers with active permits are also asked to provide data on the availability and occupancy of their accommodation units. The responses received in October, November and December 2023 include various different accommodation types and sizes and statistics for these months are accurate to within at least plus or minus 2% (at a confidence level of 95%). The responses are scaled up by the total amount of visitor accommodation (with both an active boarding permit and an aligned building use type) in order to give figures for the whole Island.
